

## **PUBLIC SAFETY NUMBERS**

Public safety numbers are required in all new subdivisions. When your new home is completed, you will be notified to pick up your safety number and have it installed. The number shall be placed in a prominent location clearly visible and identifiable from the street, as follows:

- The number shall be made of a reflective material that shall be visible by the human eye, with the use or artificial illumination if necessary, from such distance as shall permit unobstructed visibility from a vehicle on the abutting public roadway.
- The number shall be displayed at a height of between 36 inches and 60 inches above ground, on a post or stanchion that is securely anchored in the ground.
- The post or stanchion shall be located as close to the following location as is practicable, given the individual terrain of the property:
  - Not more than 15 feet off of the property line abutting the public road or right-of-way fronting the property; and
  - Between 5 feet and 10 feet off to either side of the driveway servicing the property.
